

Domino's Pizza product quality and animal welfare

At Domino's Pizza, we believe that good food is part of a good life. We deliver delicious and crispy pizzas made from fresh dough and high-quality ingredients. We connect people over good food and accompany them in everyday moments, providing unforgettable taste pleasures.

Our mission is to provide customers with the highest quality food, which is why we place particular emphasis on responsible production, taking into account animal welfare. We focus on transparency and ethical practices, ensuring that our products are not only tasty, but also manufactured in accordance with the highest standards of animal welfare and environmental protection.

Aware of our role, we strive to promote responsible and sustainable conduct:

- Throughout the supply chain: we only work with certified food producers who have HACCP, IFS, BRC FSSC 2200 systems in place. This guarantees high quality and product safety.
- Among stakeholders: we engage in dialogue with NGOs and experts to work together to find the best solutions.

Animal products

- We have examined our food supply chain and worked to develop commitments that will address the biggest animal welfare concerns.

We declare that out of concern for animal welfare and respect for the natural environment and the quality of the products we offer, the Domino's pizzeria chain has decided to phase out caged-eggs from its ingredients by the end of 2024.

We do not use shell eggs in our restaurants, and the change will apply to all semi-finished products that have eggs in their ingredients.

- Poultry farms from which livestock originates meet all the requirements set out in Polish and EU law, including the European Council Directive 2007/43/EC of 28 June 2007 on the establishment of minimum rules for the protection of chickens kept for meat production.
- Chickens are raised according to the principles of animal welfare as measured by adherence to the Five Freedoms:
 1. Freedom from hunger, thirst and malnourishment by providing access to fresh water and food.
 2. Relief from psychological trauma and pain by providing adequate shelter and resting places.
 3. Freedom from pain, injury and illness through prevention, prompt diagnosis and treatment.
 4. Freedom to express natural behaviors by providing adequate space, conditions and company of other animals of the same species.
 5. Freedom from fear and stress by providing care and treatment that does not cause psychological distress to animals.

- Currently, 100% of breeding takes place in litter poultry houses, and cage systems are not used. Two methods of stunning are used: controlled atmosphere (70%) and water bath (30%). By 2030 100% of chicken meat (frozen and processed) used in our menus will meet the [European Chicken Commitment](#) criteria.

Animal cruelty

Domino's Pizza does not endorse, promote, or sponsor any activities or events that are in any way related to animal cruelty or mistreatment. We also commit not to use animals, both living and dead, in advertising.

Domino's Pizza is committed to continuing to work with suppliers, NGOs and other stakeholders to maintain and improve our knowledge of animal welfare in our supply chain and to adapt our policies and practices as needed. We will report on the progress on our website every year.
